

GPRS TIME AND ATTENDANCE READER

FALCON

The Falcon device is ideal for remote sites with no LAN network infrastructure as it works off 3G/GPRS connectivity. It requires a SIM card with mobile data to capture staff attendance clockings at the site and will send this information straight to your PC.

Its main function is time and attendance, but it is capable to serve as an access control device too.

Access control device

Fingerprint and card scanning with capacity of 3000 fingerprints and 3000 cards

Time and attendance monitoring

Pin code access available.
3000 pin codes capacity

Stand-alone or network based indoor device

Bundled with Mi-Time Lite Software
